Upgrade Without Replacing Your Entire Security System

If you have a DSC, Ademco, or Paradox alarm system, you don't need to start from scratch to enjoy the latest smart security features. With a simple addition, Palladium Interactive transforms your legacy system into a modern, connected solution—all without the cost of a full system replacement.

WHY UPGRADE INSTEAD OF REPLACE?

- ⇒ **Cost-Effective:** Keep your existing system and add interactive features at a fraction of the cost of a new installation.
- ⇒ **Future-Ready:** Enjoy the latest technology, including 5G cellular integration, without losing the investment you've already made.
- ⇒ **Seamless Transition:** No need to rewire your home or replace all your equipment—your current system becomes smarter overnight.

The Smart Choice

Why pay for a complete new system when you can modernize what you already own? Palladium Interactive gives you the power, convenience and peace of mind of a smart security system with the big investment.

READY TO UPGRADE

Contact PALLADIUM SECURITY today and discover how easy it is to bring your existing system to the future
